Applicant's election without traverse of Group II in the reply filed on May 15, 2006 is acknowledged.

The second claim 5 on page 19 has been renumbered to be claim 8.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 is a method claim that depends from an apparatus claim. An amendment to the claim changing the claim to depend from claim 7 would overcome the rejection.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Trostmann (4,047,478) and see figures.

Claims 7 & 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Michael (6,268,002) and see abstract and figures.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7 & 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Michael (6,268,002).

Michael discloses a meat stuffing that is wrapped in grape leaves by the folding method of figure 2 and an apparatus that uses folding plows (figures 5 & 8). The claims appear to differ in the recitation of the particular apparatus used in the method but apparatus limitations do not carry any weight in the method claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art further shows the state of the art relating to preparing filled foods.
